

2.3. INTERNAL CONTROL PROCEDURES

2.3.1. INTRODUCTION

This report describes the internal control procedures in place within the TF1 group. It covers TF1 SA (the parent company) and subsidiaries over which it exercises exclusive or majority control.

2.3.2. INTERNAL CONTROL ENVIRONMENT AND GENERAL PRINCIPLES

2.3.2.1. Organisation and operating procedures

Background

This report is based on information and analyses compiled in collaboration with the various players involved in internal control within TF1 and its subsidiaries, and gives a factual description of the control environment and the procedures in place.

The Internal Control Department co-ordinated the preparation of this report. The Internal Control Department conducted a validation procedure involving the Group Finance, Strategy and Procurement Division and the Legal Affairs Department before being submitted to the Statutory Auditors.

Since the 2007 financial year, TF1 has analysed its internal control system and presented its internal control report in full compliance with the internal control framework published on 22 January 2007 and derived from work carried out by the task force set up by the Autorité des Marchés Financiers (AMF), the French Financial Markets Authority. The AMF reference framework was amended in 2010 to incorporate legislative and regulatory changes in the area of risk management, and the AMF recommendation on Audit Committees.

An internal control system should also contribute to control over operations, effectiveness of transactions, and efficient use of the Company's resources. However, such policies and systems cannot provide absolute assurance that objectives will be met, or that the risks to which the Group may be exposed will be fully addressed.

TF1 continually adapts its internal control system to reflect the nature of its operations, its evolving business model and its strategic goals.

The general internal control environment is underpinned by the Group's corporate governance principles, as well as by its organisational structure and operating procedures and by dissemination of its values and rules.

The organisation, composition and operating procedures of the Board of Directors and of the specialist committees that assist the Board (the Audit Committee, the Selection and Remuneration Committee and the Ethics, CSR and Patronage Committee), as described in the section on corporate governance, comply with corporate governance rules and are conducive to effective internal control.

The Board, under the authority of its Chairman, determines the Company's policies and, with the support of the Audit Committee, ensures that appropriate internal control systems are in place within the Group. Key commitments are subject to clear validation processes, with decisions being made by Executive Management based on proposals from the relevant committees. The Board of Directors is kept regularly informed of such decisions. Rodolphe Belmer, as Chairman and Chief Executive Officer of TF1 group, has operational and functional responsibility for implementing the strategy approved by the Board of Directors for the Group's operations. In particular, he is responsible for organising the deployment of internal control. He is supported by the Executive Committee (COMEX), which comprises the senior executives of the TF1 group and meets weekly, and by the General Management Committee (CODG), which includes the heads of each business line and support function and meets monthly. These Committees enable him to communicate the key internal control policies, and to make executives aware of their responsibility for setting up and monitoring internal control systems in their area.

Powers are delegated to meet the twin objectives of making operational staff accountable and controlling commitments at the appropriate level. On the latter point, the Company's organisational structure builds in segregation of duties: operational functions are kept separate from accounting functions so as to allow for independent control.

Every year, the Strategy and Performance Division works with the COMEX members to prepare a multi-year plan setting out the broad lines of the Group's medium-term strategy. The first year of the plan corresponds to the budget for the forthcoming year. It lays down the framework for commitments made by managers of Group entities.

The plan is a key element of the internal control environment, and is consistent with the evolving business model. As well as setting revenue and cost targets, the plan also specifies the resources, structures and organisational methods needed to meet those targets.

A summary of the TF1 group multi-year plan is presented to the Chairman and CEO and then to the Board of Directors, which approves the budget.

The internal control system and its objectives

In addition to the multi-year plan, the TF1 group is constantly looking to improve its internal control system, maintaining close alignment with its objectives. Since 2007, the TF1 group has followed an approach applied by the Bouygues group for its main business lines (including TF1), designed to develop an internal control system based on the AMF reference framework. This process identified a number of simple, measurable principles covering the Company's key businesses.

The system is organised around two components:

- accounting and financial internal control principles relating to the co-ordination, organisation and preparation of accounting and financial information;
- general internal control principles encompassing all of the Company's key processes.

The approach also builds in regular, structured meetings between internal control representatives from each of the Bouygues group's business lines, to organise monitoring of internal control and manage adaptations to deal with regulatory requirements. This shared system is regularly supplemented by internal control principles specific to TF1's operations, and to changes in its business model, strategic goals and environment.

Within the TF1 group, the internal control system is assessed through annual campaigns across a scope that is representative of the challenges and risks inherent in its various activities. A partial scope is covered each year, but the scope changes from year to year so that the control principles are addressed over approximately four years.

A self-assessment campaign is used. Within each entity, the person responsible for the process being analysed prepares and justifies their assessment of the application of internal control principles. This is then submitted for validation by a person with a critical perspective (line manager and/or business unit manager). Since 2014, most self-assessments have been in the form of interviews between the person responsible for the process and the Head of Internal Control. This approach helps transmit knowledge about the internal control framework. However, the person responsible for the process still determines the overall rating. Since 2022, the broader scope includes the Group's global subsidiaries.

The assessment process has several components: a numerical rating on a scale from one to four, a description of operating procedures, and comments on any discrepancies between operating procedures and best practice. The assessment is supplemented by proposed action plans, to ensure that the annual assessment campaigns result in tangible improvements in the management and security of processes.

The consolidated results of these campaigns are distilled into an aggregate summary by topic, function and operating entity. This serves to alert the Executive Management to any inadequacy detected in particular processes, and to guide and prioritise action plans. The results are also presented to the TF1 Audit Committee, which in turn informs the Board of Directors.

New businesses are incorporated into the assessment campaigns in a manner that reflects the gradual introduction within those entities of the processes, tools and methods used by the TF1 group to co-ordinate, oversee and control operations.

The 2023 assessment campaign addressed topics related to information systems, internal and external communications as well as all TF1 business-specific principles: channels-broadcasting, acquisitions-programming schedule-inventories, investment-coproduction requirements, intellectual property-copyright and neighbouring rights. The 2023 campaign also covered guarantees and treasury-financing.

The majority of revenue-generating entities within the TF1 group were included in the scope of self-assessment.

Audit assignments are also carried out to check the accuracy of internal control self-assessments. Since 2014, Internal Audit and Internal Control have operated within a single Audit and Internal Control Division (DACI), helping to improve risk control and management within the TF1 group. The DACI also handles the risk mapping associated with internal control.

Identifying and managing risks

Group risk mapping relies on feedback from regular Risk Committee Meetings within the operating units and support functions of Group entities about key events that could have an adverse impact on attainment of the objectives in the multi-year plan.

These committees are tasked with identifying emerging risks, systematically reviewing all risks identified during previous financial years, and removing any risks that no longer apply.

Each risk has an "owner" who is responsible for describing the risk, developing scenarios and assigning probabilities. Some of the potential financial impacts first undergo a detailed analysis; a process then repeated according to the definitive plan. This is to ensure that risks can be prioritised and specific risk mitigation measures developed. A distinction is drawn between measures that reduce the probability of a risk occurring, and those that reduce the impact of a risk occurring.

The Risk Committees meet in late September. Monitoring is carried out in March to measure progress on the resources put in place to mitigate risk and propose additional action plans as necessary.

For a description of the principal risks and how they are managed, refer to section 2.1 ("Risk Factors") of this Universal Registration Document, which also describes the Group's policy on insurance. Market risks (including interest rate risk and exchange rate risk) are discussed in Note 8 to the consolidated financial statements in this document and the Annual Financial Report.

2.3.2.2. Control activities

Alongside internal control and risk management, the TF1 group also performs various controls within the Operations Divisions and, more directly, via the support functions.

Technologies and Information Systems Division

Control over broadcasting and other vital company operations

The Technologies Division is responsible for making programmes where it has been retained as producer; for the broadcasting of programmes, and the transmission network; and for developing and running the IT applications required for Group-wide operations.

Applications used to help ensure that accounting and financial information complies with best practice in control are described in the section on "Financial Information Systems" below.

The Technologies Division coordinates the identification, control and prevention of major technological risks liable to affect broadcasting service continuity and the ongoing conduct of the Group's vital operations.

To fulfil this remit, the Division works with the Corporate Services Division (responsible for property and facilities management) to develop security policies in two key areas:

Business continuity

The crisis management process in place at TF1, identifies and updates the main risk prevention scenarios, and any disaster recovery scenarios required for key processes.

A secure external backup site is in place to ensure resumption of key processes: programme transmission, the production of news bulletins, the preparation and marketing of advertising spots, and the operation of information systems (especially accounting, treasury and payroll).

In the event of a very serious incident, "backstop" arrangements handled by a specialist third-party service-provider would enable the TF1 channel to continue broadcasting autonomously for several days.

Procedures are tested regularly so that the system can be adjusted if necessary.

A crisis management manual has been produced that describes how the crisis management unit will operate in various scenarios.

Content Department

Programme buying

TF1 enters into broadcasting rights contracts to secure programming for future years. The rights buying process is subject to an investment approval procedure, in which the role of each decision-maker is defined so as to ensure the segregation of duties:

- the Rights Buying Division sets out the key features of the project, such as the unit price and the number of screenings;..
- the Artistic Division checks that the programme complies with editorial policy;
- the Programming Division checks that the rights are aligned with the programming schedules of the Group's various channels, as well as with each channel's audience and inventory management targets;

Information systems security

In response to the increased risk of cyberattack, the Technologies Division has introduced extra security measures that go beyond compliance with internal control principles on information systems security:

- extension to the coverage of the Security Operations Centre (SOC) for continuous monitoring of information systems and detecting malfunctions caused by cyberattacks;
- regular audit by external specialists to assess the resilience of systems and technical facilities to new risks, and to perform intrusion tests (including in the Broadcasting space). These arrangements are supplemented by a dedicated in-house team that assesses the security of various systems and develops remediation plans where appropriate.

The Division also works with the Internal Communications Department on campaigns to raise user awareness of cyberattacks, with a special focus on the vulnerability of attachments and web links;

- systematic involvement of IT security teams, and in particular the Head of Information Systems at an early stage in the development of systems used to produce and transmit TV content as well as monetise their advertising. These teams ensure that the security policy is correctly applied, and that the system architecture selected is and will remain compatible with security imperatives;
- implementation of a programme assurance system involving periodic audits by an external consultant of the TF1 group's cybersecurity approach and action plan;
- cyber crisis management exercises are frequently completed.

- the Group Finance, Strategy and Procurement Division validates the relevance of the acquisition, comparing it against the cost of future programme schedules and Programme Unit investment budget, the projected profitability of the acquisition, and the level of inventory. It also checks that the purchase price is in line with market prices and that performance clauses have been included.

At least once a year, the Legal Affairs Department and the Operations Divisions agree on the contractual policy to be applied by each programme unit, with compulsory or ancillary clauses applicable to rights buying contracts.

Final approval of rights buying contracts is signed off by either the Chief Executive Officer of the TF1 group or the Chief Executive Officer of the commissioning channel (or their proxies) in line with delegated powers.

Sports rights are usually acquired by bidding in a tendering process. Such bids are governed by domestic regulations (the French Sport Code – "Code du Sport") and by European regulations. For the most significant projects, the Board of Directors sets up a Special Committee to advise on the bid.

Controls over programme compliance

Programmes broadcast on the Group's channels are subject to control by ARCOM (the French Broadcasting Regulator) under agreements signed by the channels. Consequently, the TF1 group's Programme Compliance Division reviews programmes prior to broadcast on its channels, sometimes in collaboration with the Legal Affairs Department. This process also helps

Business Division

Controls over advertising compliance

Dedicated teams at the TF1 Pub ad sales house preview all the advertising spots for the channels on which they sell space (TF1, TMC, TFX, TF1 Séries Films and LCI). They also ensure that all the spots have been submitted to the ARPP (the French Advertising Regulator) for pre-vetting, and passed for broadcast.

Finance, Strategy and Procurement Division

The Finance, Strategy and Procurement Division includes all of the Group's strategy and finance functions. It plays a control role by disseminating procedures, methods and guidance throughout the Group.

Since September 2021, the Division is organised through a process-based approach:

- Transactional;
- Reporting and Financial Statements.

The following divisions report to the Executive Vice President, Finance, Strategy and Procurement:

- Audit and Internal Control Division;
- Business Plan, M&A and Financial Communications Division;
- Strategy and Performance Division;
- Cash Performance Division.

Audit and Internal Control Division (DACI)

The TF1 group's Internal Audit function conducts financial, operational and organisational audits in Group entities (except for audits of the reliability, security and operation of information systems, which are performed by the Bouygues group's Central Audit Department).

All of these audits are conducted according to an annual plan approved by the Executive Management and Audit Committee of the TF1 group. Audit Committee Meetings include progress reports on the plan, and presentations of key findings and recommendations of completed audits.

Audits are performed following a strict methodology aimed at meeting the standards set by the French Institute of Audit and Internal Control (IFACI). Each audit ends with a report containing recommendations, which are systematically covered by an action plan to be applied by the audited entity and monitored by the Internal Audit function.

minimise the legal and regulatory risks inherent in broadcasting television programmes.

Programmes intended for children are submitted for advice from psychologists, who are asked to preview the most sensitive programmes.

TF1 Pub monitors compliance with laws and regulations covering the broadcasting of advertising messages on various types of media. Teams from each broadcaster check that the maximum daily and hourly broadcast times for advertising are not exceeded.

Transactions and Procurement IS Division

This Division covers various units:

Group Procurement Division (other than audiovisual rights buying)

The Procurement Division provides a framework for supplier relations (excluding audiovisual rights suppliers) and optimises the procurement process by applying a high-quality supplier referencing process and a rigorous selection methodology, in line with best practice.

Our commitment to Responsible Procurement is described in section 4.3.2.2 of this Universal Registration Document, entitled "Responsible procurement".

Tools and Projects Hub

The Tools and Projects Hub is responsible for managing the deployment and upgrades of tools comprising the financial information system. The Hub also conducts a review of business processes.

Supplier and Client Transaction Support Division (orders/ payments and invoicing/recovery)

The teams are responsible for issuing client invoices, booking them and reconciling them with the payments received. They also record and verify the purchase invoices received from the Group's suppliers and issue the means of payment for the Group's entities.

The teams complete these tasks by applying procedures consistent with key internal control principles (such as segregation of duties and multiple independent validation), and payment security rules established by the Treasury Department (such as authentication and tamper-proof payment media). This department also verifies anti-corruption, as required by France's Sapin 2 Law, and participates in third-party assessment as part of the management of financial reporting systems.

Treasury and Financing Department

This department assesses the Group's funding requirements and ensures that adequate funding is available from sustainable and diversified sources.

It provides centralised treasury management services for the Group (bank accounts, cash pooling, and interest rate and forex risk management), and oversees the security of the Group's money flows while reducing associated risks, including fraud, legal and counterparty risks.

Group Tax Division

The Group Tax Division co-ordinates and advises the teams responsible for compliance with tax obligations at Group entities. To that end, it provides them with the support necessary to manage their daily work. The Division also ensures the appropriateness and consistency of the main tax options selected by the entities.

In addition, it oversees monitoring and support for teams during tax investigations or controls and handles any litigation with the tax authorities.

Reporting, Accounts and Financial Statements Division

The Reporting, Accounts and Financial Statements Division fulfils two main tasks:

The preparation of the individual and consolidated financial statements of Group companies.

The teams in charge of this process are organised into activity units (Media and Production) and skill hubs. They keep accounting records of transactions entered into by TF1 group entities, and carry out all accounting closes required for the preparation of financial statements.

The team is responsible for establishing and applying accounting policies and preparing the individual and consolidated financial statements of Group companies, the process for which is detailed in section "2.3.2.3. – Process for managing published accounting and financial information."

Experts monitor developments in international (IFRS) and French accounting standards to ensure the relevance of accounting policies, as well as team co-ordination and training by drafting and distributing Group-wide rules, procedures and accounting policies.

The preparation of monthly reporting and steering of an update and re-forecasting process for Group companies.

The Reporting, Accounts and Financial Statements Division monitors delivery on the objectives set in the annual budget as approved by the Board. Key steps in this process include:

- the monthly Group reporting package, which summarises and comments on key financial and operating information relating to the various Group entities/divisions and on current or future events that may have an impact.

This document is based on the monthly reporting packages prepared and commented on by each business unit. These include a monthly accounts close, a revised end-of-year forecast, and performance indicators. The Division checks, validates and analyses these packages and then prepares a consolidated dashboard at Group level, which is presented to Executive Management at a set time each month.

At each monthly accounts close, the accounting and management control teams work together to ensure that all expense and income items are recorded and recognised in the correct accounting period. The financial information used in management reporting and in the financial statements all derives from a shared Enterprise Resource Planning (ERP) platform common to all the main structures within the Group, which ensures consistency and control of the data outputs;

- two updates, to allow for adjustments to year-end projections and recalibrate action plans if required;
- a process of regular re-forecasting to assess the impact of current events and give greater agility in high-level business management;

- monthly operating indicators reflecting short-term management objectives for the various business units. These may be used to develop action plans, and hence to measure performance;
- each week, additional margin analyses and studies are directly prepared for individual channels, programmes, day-parts or hourly slots; these are used to focus action plans.

In addition to the tasks above, in 2023, teams mostly worked on a cross-functional basis to:

- continuously improve the reporting process and activities to ensure a more efficient and effective accounts close procedure each quarter, with optimised intra-group accounting within the Production division;
- standardised and streamlined reporting for Media division business units using Power BI, as part of a shared model.

Business Plan, M&A and Financial Communications Division

Working in tandem with other TF1 group Divisions, the Business Plan, M&A and Financial Communications Division structures the strategic plan into financial targets, oversees potential mergers, acquisitions and disposals, and informs the financial markets of Group communications, particularly through quarterly releases.

Business Plan

The strategic planning approach is underpinned, with the active support of the Strategy and Performance Division, by an analysis of market trends and of the evolving relationship between industry players, consumption patterns, and the competitive environment. Risk mapping is also taken into account.

In July of each year, once the industry analysis and strategic priorities have been approved and Executive Management has aligned itself with those priorities, strategic guidance notes are prepared and sent to all Group entities.

Each entity prepares its own three-year plan, with active support from the Business Plan Department to ensure that business plans are compiled to consistent and uniform standards across the Group.

The plan is approved by the Board of Directors annually.

M&A

The M&A Department supports the Group in developing its scope of consolidation, overseeing all related acquisitions, disposals and mergers. It regularly monitors investments made in companies, relying on the financial, legal and operational divisions to ensure that their market plan is consistent with the objectives when acquiring the entities.

Financial Communications

The Financial Communications and Investor Relations Department engages with shareholders, investors and analysts and ensures that the markets and the financial community are regularly updated to give them the clearest and most comprehensive understanding possible of the Company's strategy and business environment (see more details in the section on "Process for managing published financial information" below). This mission is followed in strict compliance with market rules and notably, the principle of equal treatment for all investors.

Strategy and Performance Division

- The Strategy team is responsible for co-ordinating the TF1 group's strategic discussions and analysis to assist decision-making in the definition of medium-term areas of business development and short-term action plans.

The Strategy Division supports the Group's various businesses on five priority tasks:

- monitoring developments in the media sector (technologies, regulations and competitors) to anticipate any consequences for the TF1 group;
- defining the Group's three-year strategic plan in current and projected markets, with the formalisation of action plans and the main performance indicators to be monitored which will enable the right business trajectory;
- carrying out analyses and modelling on the various issues or opportunities available to the Group, in connection with structural changes in the market and the offer;
- supporting business lines on strategic challenges with respect to development, transformation and partnerships, and assisting with the management and co-ordination of cross-functional projects;
- participating in corporate governance (Executive Committee, General Management Committee, Management Committee, Board of Directors) to ensure dialogue and alignment with priorities.

In collaboration with Human Resources (HR) Directors, particular attention is paid to internal communication on strategic priorities in an effort to ensure that all employees perform their tasks in line with the TF1 group strategy.

- The Performance Management team includes "Performance Managers" who conduct targeted, impactful analyses in connection with the Group's businesses. The purpose of these analyses is to develop operational action plans and predict their effects, as well as to define then monitor performance indicators that track progress. In doing so, this team provides in-depth insights to enhance performance across businesses – addressing key challenges – and supplies the tools required to assess such improvements. The team is responsible for:
 - analysing and mapping, in close collaboration with operational teams, potential value-creating mechanisms and options, and identifying possible drivers, factoring in the Group's strategic objectives;

Human Resources Division and CSR Department (DGARH and CSR)

The Human Resources Division and CSR Department (DGARH and CSR) plays a key organisational role in defining the human resources planning strategy and its ongoing development. To achieve this, the Division is tasked with implementing and monitoring the activities below.

Compliance with legal obligations in labour law

A standard bearer for compliance with legal obligations in labour law, the Human Resources Division and CSR Department engages in a constructive social dialogue. In this spirit, the Division supervises employee representative bodies (Works Council) during monthly ordinary meetings and specially arranged extraordinary meetings. Such meetings focus on statutory information and consultation for employee representatives.

- building models for our activities to illustrate the impact in terms of short and medium term value creation of the various possible operational action plans, to choose a target scenario with the business line(s) concerned;
- gradually defining and monitoring the financial and non-financial Key Performance Indicators (KPIs) to implement the finalised action plan; and where appropriate, develop and update the post-mortems before re-updating objectives;
- guaranteeing that operational action plans are fully respected in the various updates, budgets and three-year plans, on top of the Group's financial statements.

The team also conducts longer-term studies to understand and model key issues in the development of TF1's business model, for use by the Finance Department and Operations Divisions.

- The Data and Economic Analysis team assists the Strategy and Performance Management teams, and the Finance, Strategy and Procurement Division on a wider basis to ensure:
 - data management, both internally (including from business segment IS Departments) and externally (economic, sector and competitor data);
 - data processing (including statistics and/or modelling), analysing data and making it available for the relevant teams.

Cash Performance Division

The Cash Performance Division seeks to:

- develop understanding and management of the Group's cash generation, on the one hand, through its business model and operations, and on the other, through expense/revenue items including capital expenditure;
- strengthen our ability to model/forecast our short- and medium-term cash positions – first by streamlining/organising our Finance processes around an integrated P&L/Balance Sheet/Cash Flow Statement approach – and second by encouraging operations staff towards accrual accounting;
- encourage operations staff to take control of cash management issues, with the aim of optimising the Group's financial resources, by focusing our efforts on high-potential areas (acquisition of rights stocks and General Terms and Conditions of Sale for advertising), and then working on a cash-centric approach based on payment-generating events.

The Social Affairs Division is also responsible for negotiating collective agreements with trade union bodies.

Works Council meetings are supported by regular monitoring committees for collective agreements negotiated on a Group-wide basis. These committees organise the sharing of assessments as well as the suitability of the resources to achieve the objectives set by the agreements.

A new round of professional elections was held as elected representatives' terms ended, furthering the excellent social dialogue established previously. 2023 saw all bodies renew their membership, ensuring fair representation within the Media segment for the next four years.

Payroll management

As managers of the payroll, the Human Resources Division guarantees consistency between businesses' operational needs and human resources management, in relation to the trajectory set. As such, the Division manages headcount changes and their impact on payroll, which are closely aligned with staff turnover, thanks to monthly monitoring and reporting for Management. The established trajectory corresponds to the resource planning defined by the strategic priorities presented annually to employee representatives.

From an operations standpoint, this management reflects the development of a recruitment plan and the definition of related budgets, monitored monthly by the operational human resources managers and social management control.

Front line HR managers and operations directors conducted a thorough review into grading of positions within the organisation. Its purpose: to use external benchmark data in our recruitment practices and oversee the Group's external appeal and talent retention expertise.

Payroll processing and mandatory social security declarations

As an employer, the Human Resources Division manages employee payroll and mandatory social security declarations. All payroll practices are audited on a quarterly basis by the Statutory Auditors. The latter inspect and verify payroll compliance with the related processes.

With regards to process compliance, the Human Resources Division was also involved in a GDPR compliance initiative on relevant processes and tools. In this respect, an audit with the DPO (Data Protection Officer), and business specialists including an action plan developed in 2020, was marked as complete. The auditor assessed overall progress in the action plans at 100%, judging the scenario to be satisfactory while emphasising the need for a long-term vision.

Continuous improvement of HR process tools and KPIs

Numerous initiatives to introduce and/or scale up quantitative and qualitative indicators throughout HR processes (recruitment, salary increases, performance, training, etc.) are led to increase efficiency. These efforts have produced deliverables that review annual appraisal campaigns, enabling HR and operations teams to assist employees more closely.

General Counsel's Department

The Group General Counsel's Department has changed and is structured into the four sub-departments below:

- **the External Relations Department** which is directly responsible for:
 - managing contacts and discussions with public authorities;
 - keeping track of corporate sector developments and contributing to public and parliamentary debate as well as monitoring laws, rules and decrees that affect the broadcasting industry;
- **the Regulatory and European Affairs Department**, tasked with:
 - monitoring compliance with regulatory requirements (production-related obligations, reporting for ARCOM, etc.);
 - managing relations with trade unions in the audiovisual sector such as the French Collective Management Organisation (OGC), the French Copyright Collection Agency (SACD) and the French TV Producers Association (USPA), in addition to dealing with industry-wide agreements on broadcasting and production;

Career path management

The Human Resources Division is responsible for managing employees' career paths, thereby ensuring that their skills are maintained and developed through organised training programmes, in line with the Group's strategic priorities and individual requirements. To this end, HR Directors guarantee staff employability as well as support that reflects the transformation of the business lines. Impact mapping is conducted annually, focusing on strategic priorities and contextual changes for businesses and skills. This helps to plan support measures more effectively.

In 2023, in response to further critical challenges, an amendment to the GEPP (Management of jobs and career paths) was unanimously agreed. The GEPP sets out a range of support mechanisms for businesses that are fast developing and sensitive to change.

To guarantee that skill sets and profiles fit the business needs, a talent review is organised each year which is spearheaded by the HR Development Department. The latter enables TF1 to prepare succession plans and determine the support required for Management Committee members.

Employee and manager support

On a daily basis, operational human resources managers support employees and managers on individual challenges they may face within the Company. They serve as a source of information for all internal communications on the workplace as well as advising managers in their support for teams.

For TF1 group, employee assistance through internal mobility is a vital asset, providing an immediate solution to organisational needs since it accelerates diversity and inclusion. In this regard, myriad initiatives are promoted via the career and mobility coach, not forgetting career workshops with content updated each year.

Quality of Life at Work

Since employee health and safety remains a top priority, a number of actions were taken as part of the Quality of Life at Work agreement. Special attention is given to sustaining employment for staff suffering from health issues and employees with disabilities.

- monitoring European Acts (directives, regulations) which affect the broadcasting industry;
- **the Compliance and Competition Department**, established to fully spotlight compliance issues. It focuses on:
 - compliance issues, particularly those involving ethical matters;
 - anti-corruption measures, influence peddling and conflicts of interest;
 - duty of care;
 - personal data protection;
 - centralising and moderating the Group's competition law issues, in close conjunction with legal teams and business lines.

Consistent with the GDPR, the TF1 group has appointed a Data Protection Officer (DPO) within this department who is tasked with co-ordinating compliance actions relative to personal data protection and informing and advising TF1 group business segments in this area. The DPO relies on a network of operational data referents and legal and IT specialists designated in each function. It also manages relations with the CNIL, the French Data Protection Agency.

Lastly, pursuant to our ethics principles and the legal provisions in force, the TF1 group has set up a platform to collect and process alerts sent by employees of Bouygues Group entities (permanent or sporadic) as well as external stakeholders (subcontractors, suppliers, clients, partners, etc.) and to ensure secure communications. Alerts are handled by business line Ethics Officers and/or Human Resources teams. When an alert is sent, the person's identity remains fully confidential. This applies for the duration of alert proceedings.

- **The Legal Affairs Department** is organised into the following four divisions:
 - Content Division;
 - Corporate, M&A and Group Administration Division;
 - Partnerships Division, including digital, distribution, diversification and music activities;
 - Advertising Division.

Newen Group's Legal Affairs Department also reports to the TF1 group Legal Affairs Department.

The Legal Affairs Department is responsible for:

- determining the contractual policy and supervising its enforcement within the Group, and more generally monitoring and negotiating key acquisition, content, licence, distribution, broadcasting, technical and sales contracts in compliance with governance rules;

- dealing with matters relating to company law (including secretarial support for Board Meetings and General Meetings of TF1 SA, as a publicly listed company), assessing or even managing legal aspects of business development proposals (corporate acquisitions and divestments, restructuring, etc.), handling notifications to the French Competition Authority as well as relations with the AMF, the French Financial Markets Authority, the HCGE, France's High Committee on Corporate Governance, and AFEP/MEDEF, the French Associations of Large and Mid- to Small-Sized Companies;
- attending to court proceedings and litigation or disputes in all jurisdictions (including the administrative courts), with risks and claims monitored in close collaboration with the Group Finance, Strategy and Procurement Division to ensure that they are correctly reported in the financial statements;
- managing intellectual property such as rights, brands and domain names, and protective measures (especially against piracy);
- monitoring management risk, insurance, and real estate assets. In particular, the Legal Affairs Department works to optimise and secure the insurance policies taken out by TF1 and its subsidiaries to guarantee sufficient coverage against potential risks as well as to ensure adequate insurance cover and that premiums and deductibles are commensurate with risk exposure.

Lastly, the Legal Affairs Department works with the Human Resources Division to oversee a consistent policy on delegation of powers. Specifically, subsidiaries over which TF1 exercises exclusive control have been delegated powers based on guidelines established at Group level. At jointly-controlled subsidiaries, internal control is organised on the basis of the TF1 group's expertise and in compliance with shareholder agreements.

2.3.2.3. Process for managing published accounting and financial information

Financial information systems

The Technologies Division, in conjunction with the Tools and Projects Hub and the Finance, Strategy and Procurement Division, deploys and supervises the TF1 group's financial information systems (accounting, management, treasury and consolidation).

As part of the Group's information security policy, technical support and training are provided to staff to help prevent viruses or hacking attacks. This is backed by the "Eticnet Charter", a regularly updated document designed to ensure staff take these issues seriously.

TF1 has tools in place to guarantee control over commitments and payments:

- systematic centralised controls:
 - SAP access controls, based on a user role incompatibility matrix;
 - commitment approval procedures based on internal control rules;
- centralised creation and management of databases (suppliers, inventories);
- acceptance only of invoices that relate to a commitment validly approved within the system, by a shared invoice administration department, thereby enhancing segregation of duties between checking invoices on receipt, approving them for payment, and signing off the payment.

Process for the production, consolidation and approval of the financial statements

The accounting processes are defined to ensure that transactions are accurately reflected in accordance with the principles of reality, completeness and consistency of methods.

At each accounting close, period-end adjusting entries are subject to a review.

In addition, the Reporting, Accounts and Financial Statements Division ensures that asset valuation processes are properly applied, consistent with the accounting policies set out in the notes to the financial statements:

- *Goodwill and equity holdings recognised in the balance sheet*: periodic review for evidence of impairment, annual impairment testing, and recognition of impairment losses as necessary;
- *Audiovisual rights and other assets*: review of valuation with reference to the relevant criteria;
- *Off balance sheet commitments*: annual review, focusing in particular on commitments to secure future programming schedules and involving the Programmes and Rights Buying Divisions, the relevant channel, and the Finance, Strategy and Procurement Division;
- *Litigation and other risks*: joint review with Legal Affairs, Human Resources and the Operations Divisions.

These processes, and their outputs, are reviewed by the Statutory Auditors.

Process for managing published financial information

Only duly authorised persons may communicate financial information to the market. In addition to the Chairman and Chief Executive Officer, these include the Executive Vice President, Finance, Strategy and Procurement; staff of the Financial Communications and Investor Relations Department; and the Corporate Communications Division.

Procedures have been introduced to inform relevant employees regarding regulatory requirements in terms of insider information and negative windows. Employees who, by virtue of their positions, have access to insider information, are informed before each negative window of the obligation to refrain from any trade in the TF1 share as well as all confidentiality obligations.

Documents provided are drawn up using a process that involves several functional departments (the Finance, Strategy and Procurement Division, the Legal Affairs Department, the Human Resources Division and CSR Department and the Corporate Communications Division) with final approval granted by Executive Management and/or checks by the Statutory Auditors.

The Financial Communications and Investor Relations Department distributes and communicates financial information about the TF1 group and its strategy through, for example:

- management reports;
- the Universal Registration Document, half-yearly financial reports and quarterly financial information;
- financial press releases;
- presentations to financial analysts and investors.

Press releases including financial information are approved by the Audit Committee and the Board of Directors. Barring exceptional circumstances, they are published outside the opening hours of the Paris Stock Exchange.

The TF1 group prepares monthly consolidated financial statements using SAP-BFC (the industry standard consolidation tool), which builds in rigorous analyses and controls over data processing and outputs. Year-on-year movements in financial statement line items are analysed and fully explained.

Elective accounting treatments are reviewed with the Statutory Auditors ahead of each quarterly accounting close and presented to the Audit Committee.

The consolidated financial statements are reviewed each month by the Executive Vice President Finance, Strategy and Procurement and presented to the Chief Executive Officer.

The Statutory Auditors issue an audit opinion on the annual parent company and consolidated financial statements of the TF1 group, and perform a review of the interim consolidated financial statements.

The Audit Committee reviews the consolidated financial statements and the Statutory Auditors' report each quarter, before they are presented to the Board of Directors.

The Group files its Universal Registration Document with the AMF (the French Financial Markets Authority). Before filing, the Registration Document is reviewed by the Statutory Auditors.

The CSR information contained in the Universal Registration Document is also reviewed by an independent third party, in accordance with the implementation decree of Article 225 of France's Grenelle 2 Act.

Each issue on which TF1 publishes information is accompanied by discussion and analysis that is approved by Executive Management and updated regularly, providing robust support in the Group's relations with market players.

To guarantee investors equal access to information, all published financial information materials are made available in French and in English and distributed through the following channels:

- information intended for the general public is posted online (or sent by post on demand) on the corporate website at www.groupe-tf1.fr/en immediately upon publication;
- regulated information is disseminated in accordance with the European Transparency Directive via a primary information provider;
- analyst meetings are accessible in full without restriction via live or catch-up webcast or via conference call;
- foreign visits and discussions with market players are usually conducted by two representatives from TF1, to ensure that the information provided is accurate and to guarantee equal access to that information. Any documents presented on such occasions are posted immediately on the corporate website at www.groupe-tf1.fr/en.

2.3.2.4. Oversight of internal control

The two first lines of defence – operational management, and control activities carried out within the support functions – must themselves be subject to further controls. This is the role of the third line of defence, consisting of Internal Audit and the Audit Committee.

Internal Audit

Internal Audit performs analyses and tests, and prepares reports, helping Executive Management identify, manage and control risks more effectively.

As part of its role, Internal Audit obtains assurance (in conjunction with the Internal Control function's own assessment programmes) that self-assessments are accurate and that internal controls are

actually being applied. In the process, Internal Audit helps raise employee awareness of internal control principles.

In addition, Internal Audit actively monitors best practice in control implemented within the Group.

A summary of audit assignments is presented to the Audit Committee on a six-monthly basis.

Audit Committee

The Audit Committee was set up in 2003 and consists of three Directors. To guarantee its independence, no Executive Officer or employee of TF1 may sit on the Committee.

The Committee reviews the quarterly, half-year and annual consolidated financial statements before they are presented to the Board of Directors, and also receives a presentation on the conclusions of the Statutory Auditors. This review includes assessing whether the accounting policies used for the preparation of the financial statements are appropriate and have been consistently applied, and verifying the procedures used to collect and check the information used.

The Audit Committee is also advised of information about how the Group is perceived by the financial markets. This information is

provided to the Committee in the form of a summary of investor expectations of the Group; a description of trends in the TF1 share price; and analyst consensus estimates of current quarter and current-financial year revenues and profits.

The Audit Committee is provided with regular updates on the deployment of the internal control system, the results of assessment campaigns, major risks identified by the risk mapping process and progress against action plans to address risks. Each year, the third-quarter Audit Committee Meeting validates the Internal Audit plan for the following year. A summary report on Internal Audit assignments, highlighting the risks and degree of control for each process audited, is presented to the Audit Committee.

2.3.3. CONCLUSION AND OUTLOOK

Throughout 2023, the TF1 group continued to reorganise its processes to make them more efficient and flexible and achieve greater cross-functionality between the entities. The internal control campaign was carried out with a very satisfactory participation rate.

TF1 extended the risk mapping process by updating, reassessing and prioritising risks identified in previous years, and adding new risks that could impair attainment of the Group's medium-term strategic goals.

The Audit Committee was kept informed of all these activities on a regular basis.

All of these objectives will be rolled forward to support a dynamic vision of internal control that relies above all on the skills, sense of responsibility and commitment of all Group employees.
